DETAILED ACTION

The examiner acknowledges the reconsideration response filed 04/04/2001.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claims 1-2, 4-6, 8-12 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Braun et al. ('940).

Braun et al. discloses a system for communicating custom information to an individual including messages and queries, comprising a remote computer workstation (column 4, lines 47-56; and column 5, lines 39-51) located away from individuals residence to communicate information to an individual (column 14-15, lines 60-37), a server connected to remote device generating a script program, a remotely programmable apparatus (columns 4-5, lines 52-54) in a residence networked to said server via a communication network (column 4), a modem (column 5, lines 39-51) for receiving said script program from said server, memory device for storing said script program, user interface configured for conveying the information and for receiving input from the individual, and processor device for executing said script program, said processor device connected to said communication device and to said memory device, and a ~~and~~

measurement device providing at least one physiological parameter including blood pressure (columns 4-5).

Response to Arguments

Applicant's reconsideration response and arguments have been fully considered but is not persuasive. The applicant submitted that Braun et al. fails to disclose a (1) a remote computer workstation (2) a server connected to the remote computer workstation (3) a remotely programmable apparatus networked to the server via a second communication network. The examiner disagrees with the applicant. First Braun et al. ('940) specifically discloses a remote computer workstation (column 4, lines 47-56; and column 5, lines 39-51). Secondly although the specification never specifically states a server is used it is inherent when using TCP/IP protocol (column 5, lines 39-51) a server is needed. Lastly in Figures 1, 2A, 2B and 10 we see the remotely programmable apparatus networked to the server via a second communication network.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3736

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Astorino whose telephone number is (703) 306-9067.
